

4PM

9PM in London (GMT), 6AM in Tokyo (GMT+9)

Ecosystem Intelligence

Moderator: Katy Börner, *Indiana University*

- Jacob G. Foster, *Indiana University*

Jacob G. Foster

Jacob is an interdisciplinary scientist interested in culture, cognition, complexity, and computation. He is Professor of Cognitive Science and Informatics at IU Bloomington and External Professor at the Santa Fe Institute. Jacob blends computational and mathematical methods with qualitative and philosophical insights to study collective intelligence, the evolutionary dynamics of ideas, the co-construction of culture and mind, non-ordinary states of consciousness, and alternative approaches to AI. He is also working to reimagine social science as a science of the possible. He directs the ESOTERIC lab and Co-Directs the Center for Possible Minds at IU and the Diverse Intelligences Summer Institute (DISI).

CREATIVE INTELLIGENCE

AI, ABSTRACTION, AND THE NATURE OF CULTURE
